The plot can be built on as follows (see note under equipment):

Complex: 30% = approx 539 m²

Constructability: 0.6 m² / m² per building plot = approx 1,079 sqm

Maximum building height: 6 m + 1.5 m = 7.5 m

Number of floors: basement, ground floor and 1st floor

Distance to the limit: 3 m

Covered patios and verandas are 100% in the constructability when open side only 50%

Open terraces and a swimming pool are not counted in the constructability.

1 parking space per 75 m² / building area.

The buyer is responsible for obtaining a building permit. On request, we are happy to put you in touch with local architects, contractors and lawyers who speak your language (German, Spanish, English).

Our experts will assist you in obtaining a building permit, provide cost estimates and inform you about the progress of construction during your absence. You are in good hands at all times of your building project until the official acceptance of construction.

Construction project planning is already available and can be taken over.

Equipment

For the settlement there is an infrastructure project of the municipality for the construction of a sewage system as well as improvement of the electricity supply and roads.

New building permits will be issued as soon as the infrastructure project enters the implementation phase.

An allocation of development costs is to be expected.
