Object description

The highlight of this offer is the approx. 995 m² urban plot, which is located between two streets at the entrance to Capdepera.

To the south, along the road in the village, the plot is built on with an authentic Mallorcan village house, built around 1950. The old building has a typical Mallorcan façade, which is well preserved. You are free to renovate the two-storey village house with approx. 117 m² of living space and four large bedrooms, a bathroom with shower, an interior living room, open kitchen and dining room as well as a vaulted cellar or to demolish it and build a chic new house there. In the large garden there are fruit and citrus trees, an old wood-burning stove and a water cistern as well as a garage which can be reached from the other street. The plot offers enough space for a large pool.

A three-storey development is possible in the area of the old building, both for the renovation and the new build. From the second floor upwards, you can enjoy distant views and views of the castle of Capdepera. You can even see the sea on the horizon.

There are plans to build 9 new apartments and 18 parking spaces as well as a communal pool on the entire plot, making maximum use of the building standards, whereby the application for planning permission is the responsibility of the new owner.

This offer is an exciting property for visionaries and creative project developers!

Equipment

The interior of the village house corresponds to the year of construction and is in need of renovation.
